Exceed Soft Medicine Ball, Black

The Exceed Soft Medicine Ball is a versatile, non-bouncing medicine ball designed to add load and challenge to a wide range of indoor exercises. It can be used for wall ball exercises, functional strength training, partner drills and other controlled throwing or loaded movements.

The durable synthetic leather surface provides a secure grip and is easy to keep clean. Exceed Soft Medicine Balls are available from 3–14 kg, with the same 350 mm outer diameter across all weights.

The ball is not designed for ball slams or repeated high-impact slamming into the floor. For exercises involving forceful ground impact, use a dedicated slam ball instead.

Features

Meets Your Training Needs

A range of functional fitness, strength, agility and mobility training tools
