

Eleiko Prestera Weight Pins, Pair (Large)- Chrome

Available in three lengths, Prestera Weight Pins can be mounted to a wall or any Prestera rack to keep plates, collars, or training accessories close at hand. Smart, single-bolt construction allows the storage pins to be mounted on any upright face without interfering with other attachments for greater flexibility and space efficiency. The chromed finish is corrosion-resistant, and integrated rubber bumpers at the pin base protect equipment and dampen noise.

Features

Designed For

Storing weight plates in Prestera Racks and Rigs, with three available length to accommodate varying storage needs.

Ergonomic Set-up

For a more ergonomic set-up, we recommend placing the weight pins in a pyramid, starting with the shortest length at the top.

Choosing Your Pin Size

The shorter length (143 mm) is ideal for change plates and collars and best suited for placement higher up on the rack. It can also be used on the side of the storage legs to maximize storage. The middle length (243 mm) and long pins (343 mm) are great for storing full-size plates at the middle or bottom of the rack. Each pin can hold 200 kg.

Quality Construction

Hard-wearing chromed surface treatment provides a corrosion-resistant finish.

Decals Included

Colour-coded decals are included so that you can help lifters place weights in the right place when finished training.

Specifications

Unit of measurement
Sold in pairs

Article code
2002177

Length
469 mm / 18.46 in.

Width
60 mm / 2.36 in.

Height
105 mm / 4.13 in.

Weight
2,9 kg / 6.39 lbs

Warranty
1-10 years
