

Eleiko Turf Plain, 16 mm, Fresh Green, 20,6 m

- ✓ Indoor and outdoor
- ✓ Custom branding
- ✓ Sustainable build

The training surface built for heavy sled pushes, loaded carries and high-traffic functional zones. Eleiko Turf pairs dense, tightly packed fibres with tough polyethylene construction for reliable grip under sleds, weights and heavy foot traffic — session after session. UV-resistant and free from rubber infill, it performs indoors and out. Available with custom logo, lane marking and colour options to match any facility identity.

Features

High-density tufting

84,000 stitches/m² deliver consistent grip for sled work and impact training.

No rubber infill

Sustainable construction with no loose particles to manage or replace.

UV-resistant fibre

Polyethylene monofilament holds colour and performance outdoors.

Custom branding

Add facility logos, lane markings and colour choices to the 16 mm custom option.
