

Digital Scale for WPP0 Powerlifting

The Electronic Scale for Para Powerlifting (HCPS-5) is designed with the user in mind. A low profile ensures easy loading and unloading and we designed the unit specifically to minimize installation requirements, you simply put the weight in place on a flat firm surface, connect and calibrate the measuring instrument, and begin weighing. The supplied cable from the load cell connection box is delivered in the standard 4 meter length. Placed directly on the floor, the durable steel coated construction can handle up to 200 kg. The mechanical construction is designed to provide the rigidity required to meet the high demands of accuracy. Attaching the four load cells with their moving feet, one in each corner, means high sensitivity for very small weight changes. This design guarantees maximum accuracy and high operational reliability. The unit comes complete with a display (KFB-TM) and a stand for the display.

Features

Designed For

Assessing athletes weights for competition

User Friendly

Designed for easy access with unit on the floor

Durable Construction

Durable steel coated construction can handle up to 200 kg

Highly Accurate

Mechanical construction is designed to provide the rigidity required to meet the high demands of accuracy

Exceptional Precision

Precise within 20 grams

Specifications

Unit of measurement
Sold individually

Article code
3050443-06

Length
1000 mm / 39.37 in.

Width
1000 mm / 39.37 in.

Height
100 mm / 3.94 in.

Weight
105 kg / 231.49 lbs

Warranty
1 year
