

# Eleiko Insert Platform Half Rack

#### Black

This modified version of our IWF certified training platform fits seamlessly with Eleiko Half Racks — Prestera and XF80 Racks. We use the same quality materials from our training platforms in a more compact design with an integrated insert piece that fits within the rack. The platform is easy to assemble and maintain. Thick durable odour-free rubber mats absorb shock and sound. The platform is designed to stand up to rigorous high-volume use of today's busy facilities.

#### **Features**
