

Aerobis Blackthorn Battlerope

15m 30mm

Blackthorn Battle Ropes offer you an unrivaled functional training, or better rope training, that does not only challenge your endurance, but also your strength and coordination. The intensity of the training can be determined by the rope (the longer and thicker, the harder) and by the execution of the movement. In order to achieve bigger amplitudes of the waves, one has to exert more power. Exercises are very joint-friendly, because they consist of fluid movements. With Blackthorn Battle Ropes you get a high-quality rope for every type of rope training, whether indoors or outdoors. Thanks to the sophisticated weaving technique the ropes are at the same time more durable and 35% heavier than conventional nylon ropes at less volume. They offer outstanding 'wave characteristics' and moisture or UV radiation cannot harm Blackthorn Battle Ropes.

Features

Designed For

Functional fitness gear that can be used almost anywhere

Maximum Results

Optimal training results in minimal time through full-body movements

Training Variety

Our fitness equipment compliments each other and has individual focal points.
