

Precor EFX 835 Converging CrossRamp

P31 - moving arms, Black Pearl

The EFX® 835 with Converging CrossRamp® combines reliability with a natural converging stride path to give you the perfect elliptical for your facility. Carrying on the tradition of Precor reliability and service, the EFX is easy to clean and maintain with a covered ramp, rear-drive housing and Active Status Light™, all to improve your ownership experience. For exercisers, the EFX 885 combines the benefits of our patented CrossRamp® technology and moving handlebars for a total-body workout. The adjustable CrossRamp® technology offers ramp inclines from 10 to 35 degrees to target different muscle groups for more workout variety. And our unique converging stride path allows the exerciser's footpath to converge naturally, just like when walking or running. The P31 LED console features easy-to-use motion controls and an LED-based display that focuses on the essential fitness stats that keep users informed and engaged.

Funktioner

Converging CrossRamp® technology

Our patented elliptical path follows a natural running stride with movement that allows the user's feet to converge toward the midline of their body. Users can isolate or cross-train specific lower-body muscle groups simply by adjusting the angle of the ramp, making targeting different muscle groups easy, encouraging training variance and propelling results. Our patented elliptical path follows a natural running stride with movement that allows the user's feet to converge toward the midline of their body.

Moving Handlebars

With moving handlebars, users can push and pull with their upper body to achieve a complete workout.
