

# Precor AMT 835 Adapt. MotionTrainer

P31 - open stride, Black Pearl

The innovative and premium design of the Adaptive Motion Trainer (AMT®) 835, complete with the P31 LED console, takes fitness to a whole new feeling with the addition of the Open Stride feature. This single piece of equipment fully engages exercisers of all fitness levels with an infinite range of stride paths to create a personalized low-impact workout, each and every time. The AMT 885 provides exercisers boundless cardio variety without the need to change machines.

## Funktioner

### Adaptive Motion with Open Stride™

Open Stride™ is a unique feature that allows exercisers to adjust their stride height from 6.8 to 10 inches (17 to 25 cm) and change stride length at will from zero to 36 inches (0 to 91 cm), providing an infinite range of stride paths to engage several muscle groups.

### A Versatile Cardio Workout

With a combination of climbing, walking and running movements, moving handle bars and dual action movements between the arms and legs, the AMT® 885 allows users to focus on different muscle groups for a total body workout. With a combination of climbing, walking and running movements, moving handle bars and dual action movements between the arms and legs, the AMT® 885 allows users to focus on different muscle groups for a total body workout.
