

# Eleiko Powerlifting Training Station

- ✓ IPF Geometry
- ✓ Complete training station
- ✓ Flexible configuration
- ✓ Prestera attachment compatibility

The Eleiko Powerlifting Training Station delivers complete functionality to support a powerlifting or strength training program. The Prestera Squat Rack is the foundation for the training station with specifications that match competition requirements, so training transfers to the competition floor. It takes up less space than the IPF Combo Rack while providing more training flexibility as it can pair with Prestera attachments.

## Features

### Specs Mirror IPF Combo Rack

All spacing and positioning in the Training Combo Rack – from the upright geometry to the hole heights and spotter distance – mirror the competition certified Eleiko IPF Combo Rack.

### Easily Adaptable

The Training Combo Rack configuration is easily adapted to move between the squats and bench press. For deadlifts, simply disassemble the Combo Rack components to make space on the platform.

### Flexible Configuration

The Powerlifting Training Station adds a 2x3m rubber platform to the Training Combo Rack set up. The Training Combo Rack includes the Prestera Squat Rack, Prestera Magnetic Pin Safety Arms, Flat Bench and Prestera Spotter Attachment.

### Secure Fit

The Prestera Spotter Attachment simply and securely slots into place between the rack uprights and is fastened with magnetic pins.
