

Eleiko Training Combo Rack

The Training Combo Rack supports squats and bench presses in a configuration that mirrors our IPF Combo Bench geometry with a smaller footprint, so training transfers to the competition platform. Safety arms and a spotter stand are included for lifter safety. Stainless uprights with 25 mm spacing support precision racking with geometry aligned to IPF Competition Combo Rack spacing.

Features

Specs Mirror IPF Combo Rack

All spacing and positioning in the Training Combo Rack – from the upright geometry to the hole heights and spotter distance – mirror the competition certified Eleiko IPF Combo Rack.

Secure Fit

The Prestera Spotter Attachment simply and securely slots into place between the rack uprights and is fastened with magnetic pins.

Easily Adaptable

The Training Combo Rack configuration is easily adapted to move between the squats and bench press.

Fine Tune Adjustments

Stainless steel uprights with IPF aligned 25mm spacing deliver precision racking, and j-cup rollers allow fine-tune lateral bar adjustments.
