

Eleiko IPF Powerlifting Warm-up/Training Platform 3 x 2,5 m

- ✓ Rubber dampening tiles
- ✓ Textile surface for optimal grip

Eleiko Powerlifting Warm-up Platform features a sleek curved frame, a layer of rubber tiles to dampen sound and vibration, and an engineered textile stretched across the surface. The joint-free construction ensures a flat lifting surface, and the textile provides optimal grip during lifts.

Features

Platform Grip

The upgraded textile surface features a pile that combines stiff and soft fibres, a highly durable surface with superior grip and traction.

Rubber Tiles

High-density SBR rubber tiles minimise sound and vibration.
