

Eleiko Powerlifting Plate Rack

Charcoal

Eleiko's Powerlifting Disc Rack is raised off the ground and designed to optimize efficient and comfortable loading and unloading to support smooth transitions during competitions. The curved tube shape allows the disc to more easily roll into and out of the rack and provides more room to grasp the discs for fast bar loading. The rack holds up to nine 25 kg discs along with one each of the smaller weight plates for maximum competition support and flexibility in training settings.

Features

Designed for

Storing and organising competition plates and collars

Secure Handling

Easy to grasp plates from rack with ample space between weights

Easy Transport

Knock-down design for easy assembly and transport

User Friendly Design

Rack heights support easier loading and unloading of plates

Conveniently Collected

Plates, change plates and collars are stored together for convenient access
