

Eleiko IPF Competition Combo Rack, PUR

Charcoal

With our new squat rack bench press combo, Eleiko presents a fantastic redesign that adds durability and safety features, showcases a sleek design profile with distinctive chrome details and improves the experience for the lifter, the loaders and event organizers. The robust new design integrates a patent-pending support arm tilt mechanism for shifting the angle of the arms that is easier to operate and provides added safety measures for lifters and loaders. We maintained the champion approved, tried and tested geometry known and loved by the lifting community. The safety arms provide more room for the lifters in the bench and the bench padding is an exclusive Eleiko design, an injection moulded polyurethane cushion to better support athletes while delivering improved performance.

Features
