

Eleiko IWF Weightlifting Competition Platform

Full oak beams

Eleiko's IWF Weightlifting Competition Platform in full oak is designed for competitive weightlifting, featuring a modern design that simplifies assembly. Ten high-quality hardwood beams provide a more robust and stable lifting surface that maintains its shape, staying stiff and level for years. Produced in Sweden, the wooden deck is finished using a special process to maximize durability and traction while also minimizing signs of heavy use, providing lifters with an optimal lifting surface. The platform corners feature a rich charcoal surface finish, giving the IWF Weightlifting Competition Platform a modern aesthetic.

Features

Designed For

National, international and Olympic level competitive weightlifting

Ideal Lifting Surface

The wooden beams are treated and finished to ensure optimal traction

Long Lasting

Top quality oak beams and robust design ensures that the platform maintains its shape

Competition Certified

The platform is certified by the IWF for competition

Easy Assembly

Steel rod and wooden beam design comes together and breaks down easily for quick installation and tear down
