

Eleiko Prestera Gliding J-cup

Black - Pair Used

This product is part of our pre-lifted collection. We thoroughly inspect pre-lifted products to verify they are fully functional and in good working order. However, pre-lifted products may show signs of wear and are sold as is. The Eleiko Prestera Gliding J-Cups safely hold the barbell between sets. Once installed, they remain attached to the uprights for easy, smooth height adjustments and no loose parts on the gym floor. Designed for long-term barbell protection, the j-cups are made from durable bent steel lined with a plastic coating and feature polyurethane rollers to protect the bar knurling and support positioning adjustments. The Gliding J-Cups can be easily positioned at any height on the upright. These J-Cups are designed exclusively for the Eleiko Prestera series and are sold in pairs.

Features

Designed For

Racking the barbell

Easily Adjustable

Always affixed, J-Cups easily glide on uprights for efficient height adjustments

Protect Knurling

Polyurethane rollers protect the bar knurling and support positioning adjustments

Compatibility

Designed specifically for Eleiko Prestera System.
