

Eleiko Prestera Gliding Safety Arms, Pair

Black

When used properly, Prestera Gliding Safety Arms enhance user safety catching the bar in the event of a failed lift. The safety arms are lined with custom moulded protective liners that are knurling-friendly to minimize barbell wear. The liner is curved to guide the bar back to the center of the safety arm. Once installed, the safety arms remain attached to the uprights for fast, smooth height adjustments and no loose parts on the gym floor. The Gliding Safety Arms can be easily adjusted and positioned on the upright. These safety arms are designed exclusively for the Eleiko Prestera range and are sold in pairs.
