

Eleiko Öppen Barbell Collars

pair

With its patented open design, Eleiko Öppen Collars make it quick and easy to secure plates and change weights between sets. Simply place each collar next to the weights and press the lever down to lock them into place. Designed for general strength training, the collars feature integrated magnets and single-handed lever operation for smooth, fast plate changes. Each collar weighs 0.25 kg, adding 0.50 kg to each lift when in use. The Öppen Collars won both the Red Dot and iF DESIGN AWARD in 2021 and the Swedish Grand Award of Design in 2023.

Features

Designed for
Quick and easy plate changes during general strength training.

Magnetic hold
Integrated magnets for easy storage and a snug fit against plate hubs and change plates.

Innovative design
Patented open design supports faster weight changes and encourages collar use.

Sustainable design
Designed for durability with sustainable and recyclable materials.
