

Eleiko Pretera Magnetic Pin Safety Arms, Pair

Black

When used properly, safety arms keep the bar from crashing down on the lifter in the event of a failed lift. The Pretera Safety Arms are lined with custom molded protective liners that are knurling-friendly to minimize barbell wear. The liner is curved to guide the bar back to the center of the safety arm. To position the safety arms, simply align the peg and hole and lock into place with the stainless pin featuring our signature Eleiko knurling and logo.
