

Eleiko Prestera Safety Beams, Pair

Black

The Prestera Safety Beams are placed between the uprights, when used properly they enhance user safety catching the bar in the event of a failed lift. The beam profile allows more room when lifting and the upper side of the beams is lined with knurling-friendly plastic protection to minimize the wear on bars. Beams are easily adjustable to accommodate a wider range of users and uses and once positioned, firmly held in place with a magnetic pin. The beams are designed exclusively for use with the Prestera Power Racks.
