

Eleiko Competition Collar, pair

- ✓ One collar, three sports
- ✓ Competition calibrated and certified
- ✓ Made in Halmstad, Sweden
- ✓ Smoother sleeve rotation

Eleiko's new Competition Collar is the first to be certified by all three strength sports federations—IWF, IPF, and WPPO. The patent-pending design features a proprietary TPE ring which compresses and rotates to secure the connection between the bar flange, plates, and collars, reducing wear on plate hubs and dampening noise. Eleiko's distinctive 1.2 knurling on the lever and tightening wheel, along with the sandblasted grip contours, improve the loading experience. The compact design and indexed locking lever make for a more secure fit and smoother sleeve rotation.

Features

Precision Crafted
Made in Halmstad, Sweden, machined recycled EU steel ensures precision in manufacturing. The collars have a tolerance of -0/+10g to ensure accuracy in training and competition settings.

Smoother Lifting
Once engaged, the indexed locking lever stays firmly in place, which, together with the adjusted centre of mass, causes less interference with lifts and rotation of the sleeves.

Long-lasting performance
Material and finishing choices ensure lasting performance, while the redesigned locking lever system distributes the clamping force more evenly across the bar sleeve, reducing the potential for wear. Eleiko Competition Collars are backed by a 10-year warranty.

Secure hold
The knurled tightening wheel, together with the TPE ring, delivers superior clamping force. This is further enhanced by grooves inside the collar that matches the sleeve texture for micro-gripping, firmly locking collars in place and minimising plate shifting when dropped.

Enhanced Environments
Working with a single collar across all lifting disciplines simplifies facility purchasing and equipment management while delivering better lifting experiences.

Specifications

Unit of measurement
Sold in pairs

Article code
3085701

Length
140 mm / 5.51 in.

Width
140 mm / 5.51 in.

Height
60 mm / 2.36 in.

Weight
