# Eleiko Dual Adjustable Pulley

120 kg - Black

The Eleiko Dual Adjustable Pulley (DAP) is the ultimate compact machine for full-body resistance training. Precise craftsmanship and attention to detail deliver a smooth and delightful user experience, while the pulley system's small weight increments and low starting weights allow for a broad range of exercises. With a 1:2 ratio, the DAP provides 45kg pulling resistance with a 90kg stack, which can be increased to 60kg with the optional 120 kg stack upgrade. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

#### Sikkerhed

ELEIKO

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts.

### Minimal vedligeholdelse

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable based functional training option.
