

# Eleiko Dual Adjustable Pulley

120 kg - Black

The Eleiko Dual Adjustable Pulley (DAP) is the ultimate compact machine for full-body resistance training. Precise craftsmanship and attention to detail deliver a smooth and delightful user experience, while the pulley system's small weight increments and low starting weights allow for a broad range of exercises. With a 1:2 ratio, the DAP provides 45kg pulling resistance with a 90kg stack, which can be increased to 60kg with the optional 120 kg stack upgrade. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

## Features

### Safety

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts.

### Low Maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable based functional training option.

### The Eleiko Feeling

Eight large aluminium pulleys on each cable stack offer less internal resistance resulting in less cable wear and a smoother user experience.

### Distinctive Details

Each interaction point, from knurled pulley adjustment and trolley handles to the weight stack markings, keeps the lifter experience in focus for the ultimate training experience.

## Specifications

### Article code

BD-1-422

### Length

1936 mm / 76.22 in.

### Width

1205 mm / 47.44 in.

### Height

2370 mm / 93.31 in.

### Weight

473 kg / 1042.79 lbs

### Warranty

6 months-10 years
