

Eleiko Dual Adjustable Pulley

90 kg - Black

The Eleiko Dual Adjustable Pulley (DAP) is the ultimate compact machine for full-body resistance training. Precise craftsmanship and attention to detail deliver a smooth and delightful user experience, while the pulley system's small weight increments and low starting weights allow for a broad range of exercises. With a 1:2 ratio, the DAP provides 45kg pulling resistance with a 90kg stack, which can be increased to 60kg with the optional 120 kg stack upgrade. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

Features

Safety

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts.

Low Maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable based functional training option.

The Eleiko Feeling

Eight large aluminium pulleys on each cable stack offer less internal resistance resulting in less cable wear and a smoother user experience.

Distinctive Details

Each interaction point, from knurled pulley adjustment and trolley handles to the weight stack markings, keeps the lifter experience in focus for the ultimate training experience.
