

# Eleiko Cable Cross

120 kg - Black

- ✓ 1:2 weight ratio
- ✓ 90 or 120 kg weight stack
- ✓ Full metal construction
- ✓ Space-efficient design

The Eleiko Cable Cross features two adjustable pulley stations with a long connector so users can train various upper body exercises with full extension or support two people training independently. Mount any Pretera pull-up attachment to the connector for additional training possibilities. The weight stacks feature a 1:2 ratio, providing 45kg pulling resistance with a 90kg stack or 60kg with the optional 120kg stack upgrade. The weight increases in 3kg jumps with a 1.5kg increment plate at the top that can be positioned for smaller jumps. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

## Features

### Safety

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts. We enclose our weight stack in a metal case to eliminate the risk of pinch points.

### Low maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable-based functional training option.

### The Eleiko Feeling

Large aluminium pulleys on each cable stack offer less internal resistance, resulting in less cable wear and a smoother user experience.

### Distinctive details

Each interaction point, from knurled pulley adjustment and trolley handles to the weight stack markings, was designed with the lifter in mind to deliver the ultimate lifting experience.

## Specifications

### Article code

BD-1-320

### Length

3900 mm / 153.54 in.

### Width

1324 mm / 52.13 in.

### Height

2351 mm / 92.56 in.

### Weight

490,9 kg / 1082.25 lbs

### Warranty

6 months-10 years

### Colour

Black
