

Eleiko Cable Cross

90 kg - Black

- ✓ 1:2 Weight Ratio
- ✓ 90 or 120 kg weight stack
- ✓ Full metal construction
- ✓ Space-efficient design

The Eleiko Cable Cross features two adjustable pulley stations with a long connector so users can train various upper body exercises with full extension or support two people training independently. Mount any Pretera pull-up attachment to the connector for additional training possibilities. The weight stacks feature a 1:2 ratio, providing 45kg pulling resistance with a 90kg stack or 60kg with the optional 120kg stack upgrade. The weight increases in 3kg jumps with a 1.5kg increment plate at the top that can be positioned for smaller jumps. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

Features

Safety

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts. We enclose our weight stack in a metal case to eliminate the risk of pinch points.

Low Maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable-based functional training option.

The Eleiko Feeling

Large aluminium pulleys on each cable stack offer less internal resistance, resulting in less cable wear and a smoother user experience.

Distinctive Details

Each interaction point, from knurled pulley adjustment and trolley handles to the weight stack markings, was designed with the lifter in mind to deliver the ultimate lifting experience.
