

Eleiko Bumper Plate

10 lbs

- ✓ **Long-lasting performance**
- ✓ **450mm diameter**
- ✓ **Slim profile**

A complement to the Eleiko Sport Training Plates or Eleiko XF Bumpers, the thinner full-size Eleiko Bumper plates are an alternative option to Eleiko Change Plates or the smaller diameter XF Bumpers for lighter loads and smaller weight increases. Made from high-quality low-odour rubber the Eleiko Bumper is designed to IWF specifications with a 450mm diameter and a 50mm inset vulcanized hub.

Features

Minimalistic Design

A smooth black finish, a white raised lettering, logos and clear weight markings.

Superior Durability

The Eleiko Bumper Plate outperformed comparable plates in drop testing; enjoy peace of mind with our extended 1-year warranty, surpassing the three to six-month industry standard.

Technique and Positioning

Maintain optimal form with standard 450mm diameter.

Long-lasting performance

Durability is at the core of our design philosophy. Through rigorous testing, we´ve perfected our construction to withstand the demands of intense training sessions. While our plates´ durability is unmatched, we advise against dropping a bar loaded solely with these plates from overhead. For such scenarios, explore our range of technique plates for optimal safety.
