

Eleiko Prestera Connector Bar With Crossbar Brackets L=1720

Black

Eleiko Prestera Connector Bar with Brackets connect sections in the Prestera System to create additional training spaces and anchor points for attachments, including pull up bars, rings and suspension trainers. Two versions of the Connector Bar in two different lengths are available; one is used when the connection point is on a crossbar and one when the connection point is on an upright.

Features

Accommodate more users

Add additional height for pulling exercises to accommodate a broader range of users.

Clean design and visual symmetry

Connecting the lifting stations presents a complete unified system for visual symmetry and clean aesthetic.

Compatibility

Designed for use with the Eleiko Prestera System.

Mounting Brackets

Use 3085847 range when mounting on crossbars and the 3085848 Connector Bracket when mounting to uprights within the Prestera System.

Durable Construction

Robust steel brackets are finished in hard-wearing powder coat.
