

Eleiko Single Adjustable Pulley, Wall Mounted -120 kg

Black

- ✓ **1:2 weight ratio**
- ✓ **90 or 120 kg weight stack**
- ✓ **Full metal construction**
- ✓ **Space-efficient design**

Whether mounted to the wall or part of a multi-station configuration, the Eleiko Single Adjustable Pulley is a space-efficient, versatile cable training station with small weight increments and low starting weights that allow for a broad range of exercises. It features a 1:2 ratio providing 45kg pulling resistance with a 90kg stack, which can be increased to 60kg with the optional 120 kg stack upgrade. Maintenance-free shafts and linear bushings reduce upkeep, while stainless steel in high-wear areas ensures long-lasting performance.

Features

Safety

Safety is paramount, and our enclosed trolley design with a two-handed pop-pin operation keeps hands free from moving parts. We enclose our weight stack in a metal case to eliminate the risk of pinch points.

Low maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable-based functional training option.

The Eleiko Feeling

Large aluminium pulleys on each cable stack offer less internal resistance, resulting in less cable wear and a smoother user experience.

Distinctive details

Each interaction point, from knurled pulley adjustment and trolley handles to the weight stack markings, was designed with the lifter in mind to deliver the ultimate lifting experience.
