

Eleiko Low Row, Wall Mounted

150 kg - Black

- ✓ Full metal construction
- ✓ Space-efficient design
- ✓ 1:1 Weight Ratio
- ✓ 120 or 150 kg weight stack
- ✓ Durable PUR seat pad

Whether mounted to the wall, free-standing, or part of a multi-station configuration, the Eleiko Low Row delivers a space-efficient and effective way to train the back. Large aluminium pulleys, metal construction and distinctive details at user touch points deliver an exceptional user experience and long-lasting performance. The low row includes a neutral grip handle and features a 1:1 resistance ratio. The bench pads are constructed from Eleiko's durable, hygienic PUR cushion. The top of the metal footplate is covered with a 2mm protective rubber mat.

Features

The Eleiko Feeling

The large 150mm aluminium pulley wheels and durable 4mm cable wire mean less internal resistance and wear on the cable for longer-lasting performance and a smoother user experience.

Distinctive Details

Each interaction point, from knurled weight adjustment to the weight stack markings, was designed with the lifter's training experience in mind.

Low Maintenance

Maintenance-free shafts and linear bushings do not require lubrication, making Eleiko Cables a low-maintenance cable-based training option. The metal construction wears well in high-volume usage and ensures the equipment will stand the test of time.

Safety

Safety is paramount; we enclose our weight stack in a metal case and our pulley behind a metal protective barrier to eliminate the risk of pinch points.
