

Precor TRM 895 Treadmill, P94 Console, Black Pearl

The Precor TRM 895 Experience™ Series Treadmill is a blend of cutting-edge technology and robust design tailored for the demands of a high-traffic fitness environment. Equipped with the P94 touchscreen console and a fully integrated dash system, this treadmill offers a seamless and intuitive interface for users to engage with their workouts at every level. It's built to deliver a personalized, natural running experience, minimizing downtime and operational costs while maximizing user engagement and satisfaction.

Features

P94 Touchscreen Console for Interactive Workouts

The P94 console on the TRM 895 acts as the command center of the treadmill, featuring a 22-inch touchscreen that provides easy access to a comprehensive suite of workout options, entertainment, and detailed performance tracking. This console enhances user interaction, ensuring a fulfilling workout experience.

Integrated Dash System for Enhanced Usability

Alongside the console, the integrated dash system on the TRM 895 enhances functionality, offering additional user interface elements that provide direct control over treadmill operations. This system is designed to make adjustments and monitoring both intuitive and immediate, facilitating a more connected and controlled exercise routine.

Advanced Biomechanics and Energy Efficiency

With Integrated Footplant Technology™ and a Power Factor Correction (PFC) motor system, the TRM 895 adapts to the natural pace of the runner, enhancing energy efficiency and providing a smoother, more natural running feel. The Ground Effects® Impact Control System ensures optimal cushioning and stability, supporting a safer and more effective workout.
