

Precor TRM 791 Treadmill P94

The Precor TRM 791 Experience™ Series Treadmill combines cutting-edge technology and robust construction to deliver a premium running experience. Equipped with both the P94 touchscreen console and the full dash panel, this treadmill offers seamless control over fitness tracking and entertainment options, ensuring a fully integrated user experience. Designed to withstand the rigors of frequent use, the TRM 791 is perfect for any commercial setting seeking reliable and high-performance equipment.

Features

P94 Touchscreen Console for Interactive Workouts

The TRM 791 features a comprehensive control system, combining the P94 touchscreen console and the integrated dash panel. The 22-inch P94 console serves as the primary command center, providing users with intuitive controls for adjusting speed, incline, and monitoring vital workout metrics. The dash complements the console by offering additional functionality and seamless access to a wide range of entertainment and fitness programs, ensuring a complete and connected workout experience.

Ground Effects® Impact Control System for Enhanced Stability

With the Ground Effects® Impact Control System, the TRM 791 delivers superior cushioning and impact absorption, providing a safe and comfortable platform that minimizes stress on joints and enables longer, more productive workouts.

Integrated Footplant Technology™ for Realistic Running

This treadmill utilizes Integrated Footplant Technology™, automatically adjusting the belt speed to match the natural movement of the runner's pace, ensuring a responsive and true-to-life running experience.
