

Eleiko SVR Platform

Small - Black

- ✓ **Quieter drops**
- ✓ **Controlled bounce**
- ✓ **Stable footing**
- ✓ **Premium finish**

The original sound- and vibration-reducing platform for heavy barbell training. The Eleiko SVR Platform pairs industry-leading sound and vibration reduction with precise bounce control to create a calmer, more focused lifting experience. A reinforced deck provides a solid base underfoot, while a tightened frame construction delivers a stable feel. Freestanding by design, the SVR Platform defines dedicated lifting zones without disrupting facility flow — adaptable to different training styles and space requirements.

Features

Engineered sound reduction
SVR construction reduces perceived noise by 62% compared to 30 mm floor tiles.

Lifting surface
Reinforced standing deck and optimal grip surface create a solid, confident base underfoot.

Defined zones
Freestanding design clearly marks lifting areas in shared spaces.

Controlled bounce
Optimised drop zones manage barbell rebound for safer, more predictable lifts.

Precision build
Tight frame and deck tolerances improve stability and long-term durability.
