

Eleiko Lat Pull Down & Low Row Combo, Multi Station

120 kg -Black

- ✓ 1:1 Weight Ratio
- ✓ 120 or 150 kg weight stack
- ✓ Durable PUR pads
- ✓ Versatile training
- ✓ Space-efficient design

The Eleiko Lat Pull & Low Row Combo unites two essential cable movements in one compact, high-performing station. Purpose-built for gyms where space efficiency matters, this unit delivers a smooth pulling experience across both lat pull-downs and low rows with a fast, intuitive switch between positions. Engineered within the Pretera and Eleiko Cables ecosystem, the combo unit fits seamlessly into existing layouts, enhancing movement variety while supporting smooth facility flow. Durable materials, clean surfaces and considered touchpoints ensure a safe, comfortable experience for lifters of all levels.

Features

Durable Details

A chromed foot plate offers secure bracing and a long-lasting finish, while robust components ensure reliable use in high-traffic training environments.

Smooth, Safe Interactions

Refined mechanics, precision pulleys and clean, rounded surfaces support consistent performance with no sharp edges or distracting friction.

Dual-Function Performance

Switch effortlessly between lat pull-downs and low rows. The transition is secure and quick, keeping sessions uninterrupted and coaching flow efficient.

Pretera System Integration

Built on the trusted Pretera framework, the unit matches the line's visual identity, mechanical logic and attachment compatibility.

Compact Footprint

Designed to maximise utility in minimal space, the combo delivers full cable capability in smaller footprints without compromising feel or stability.
