

Eleiko Kettlebell Rack, two sections

Black

- ✓ 3 mm protective shelf liner
- ✓ Part of modular storage solution

Eleiko's Kettlebell Rack comfortably holds Eleiko Competition or Eleiko Training Kettlebells. Rubber shelf liners protect equipment and help dampen kettlebell handling and racking noise. These standard configurations are part of our modular Pretera System and can be expanded, mixed with dumbbell storage shelves, and customised to suit your needs.

Features

Storage Capacity

Each Pro Kettlebell shelf can comfortably hold four competition kettlebells. The capacity for training kettlebells depends on the weights selected, as the sizes vary.

Modular Storage Solution

Create custom Dumbbell and Kettlebell storage solutions using the Eleiko Two Tier and Three Tier Storage Legs (DB & KB Rack), Pro Dumbbell and Pro Kettlebell Shelves. The shelving can be built in any desired length in two- and three-tier configurations.

Design Versatility

The design language aligns with the Pretera System for a cohesive facility design. The modular system is flexible, easy to reassemble, and scales as needs change.
