

Eleiko Prestera Storage Rack

Black

- ✓ Part of modular storage solution
- ✓ Prestera design language

These standard configurations are part of our modular storage solutions for holding free weights, training tools and functional fitness equipment. As part of our flexible, modular system, create custom storage solutions using Prestera Storage Legs with adjustable feet to build tailored storage solutions with a range of shelving and training tool attachments. The storage units can be built as freestanding units to help divide spaces, making storage accessible from both sides or up against walls to maximise floor space based on facility needs.

Features

Flexible Storage

Build storage solutions in three or four-tier heights and mix and match with any of the Prestera Storage Shelves in the 1072 and 1720 lengths. Compatible shelves include Prestera Kettlebell Storage Shelves, Prestera Dumbbell Storage Shelves, Prestera Ball Storage Shelves, and Prestera Plate Storage Shelves.

Secure Footing

Storage bases feature adjustable feet to create a solid base even if floors are not level.

Design Versatility

The design language mirrors Prestera Racks and Rigs for a cohesive facility design. The modular system is flexible, easy to reassemble, and scales as needs change.

Compatibility

Work with Prestera storage shelves, baskets or storage attachment pieces to create tailored storage solutions for tidy training spaces.
