

Eleiko Weightlifting Training Plate Rack

Charcoal

Eleiko's Weightlifting Training Plate Rack features the same modern design profile as the competition rack with an expanded storage capacity, integrated barbell storage and space for a set of training collars. The base construction and shape of the plate dividers make handling, unloading and re-racking plates easier. The updated design facilitates systemized plate storage as each slot is sized specifically to accommodate the differing plate widths at each weight ensuring a secure fit and that weights are stored in the appropriate spot. The Training Plate Rack holds six 25 kg plates, two 20 kg plates, two 15 kg plates, two 10 kg plates and two of each of the change plates ranging from 5 kg to 0.5 kg. The plate rack also incorporates storage spots for two barbells and a pair of training collars.

Features

Designed For

Storing and organising plates, collars and bars

User Friendly

Base and plates divider design make plates easier to grasp, load and unload

Improved Functionality

Specifically sized slots ensure weights are stored in the appropriate place

Grab and Go

Everything you need for training neatly consolidated in one well designed unit
