

Eleiko Prestera Fitness Half Rack

Stainless

Constructed from premium Swedish steel featuring sleek uprights, optimized geometry and precise adjustment increments, the Eleiko Fitness Rack is designed to give lifters greater control and improved safety, all in a compact footprint. The 70x70 tubing and upright spacing supports both bench press and squats. The safety arms and j-cups are fully adjustable at 25 mm spacing increments, accommodating a variety of height placements and lifting positions. The optimized tubing facilitates re-racking of the bar without hitting the flange while squatting or moving in and out of the rack. The rack features four storage pins for convenient plate storage, and the stainless steel uprights protect against impact and abrasions. Hidden bolt down holes minimizes trip hazards, provides stability and maintains the rack's sophisticated appearance. Customize the Fitness Rack with a smith attachment for training versatility.

Features

Designed For

Giving lifters greater control and improved safety

Optimized Tubing

70x70 tubing supports both bench press and squat, adding space without compromising load capacity.

Integrated Weight Storage

Features four integrated storage pins on each side for convenient plate storage

Highly Adjustable

Narrow spacing increments with numbering allow users to find ideal lifting position

Compact Footprint

Uses minimal floor space to deliver maximal training versatility.
